Since 1959, Bergstrom-Mahler Museum of Glass has cultivated what has become the world's largest, most representative collection of glass paperweights on public display as well as a burgeoning contemporary studio glass collection.

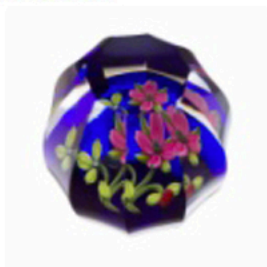

This exhibition showcases nearly 200 acquisitions of paperweights and contemporary studio glass collected by Bergstrom-Mahler Museum of Glass during the past three years. A special highlight includes a significant selection of antique and contemporary glass paperweights from the collection of longtime supporters Gary and Marge McClanahan.

The New On View exhibition runs from May 28 – August 22, 2021.

Featured Works from New On View
